VG NEWS PORTAL

1 LIVE ACTION

2 CAPTURED BY CITIZENS

3 PUBLISHED

Every reader is a potential reporter!

For the modern reader it's easy to send pictures, videos and texts with a mobile phone. A unique chance for you to be the first to publish news!

Norway's largest newspaper, VG, has for more than 30 years handled a huge amount of tips. Our tool, VG News Portal, now provides customers with an enormous

growth in citizen journalism. Don't hesitate. Teach your readers to send you their stories, videos and pictures.

KEY FEATURES

- Manage incoming SMS, MMS, E-mail and phones in one single application.
- 2-way communication – send sms and e-mails directly in return to the readers in their own language.
- View incoming videos directly in the portal – video handling and conversion.
- Distribute information to editorial departments as web, print, radio and tv instantly.
- Automatic tipper recognition and reuse in searchable database.
- Handle code words from mobile messages for auto-sorting and distribution.
- RSS- support. Geotagging. Metadata-handling.
- Security with different levels to take care of the anonymity of the sources.
- Use the portal on your own server or host the service from Teknograd AS.

Technology

The VG News Portal is based on standard technology with some major components:
Running on UNIX and Linux platforms, using Apache HTTPD web server v 1.3.x or higher, MySQL database v3.23 or higher, PHP scripting language v5x
We recommend using your favourite flavour of Linux, Solaris or FreeBSD operating system.
