Every reader is a potential reporter

For the modern reader it's easy to send pictures, videos and texts with a mobile phone. A unique chance for you to be the first to publish news!

Norways most read newspaper, VG, has for more than 30 years handled a huge amount of tips. Our tool, VG News Portal, now provide news organizations with a enormous growth potential within the area of citizen journalism.

Don't hesitate. Encourage your readers to send you their stories, videos and pictures.

Key features

Manage incoming SMS, MMS, E-mail, voice messages in one application.

Bidirectional communication - reply through SMS or e-mail to the readers.

View incoming images and videos directly in the portal.

Distribute information to the correct editorial department.

Automatic tipper recognition.

Handle codewords from mobile messages for auto-sorting and distribution.

Advanced RSS support.

iPhone application included.

Twitter monitoring.

Geo tagging module. View employees, freelancers, images or tippers on a map.

Facebook integration. Receive messages through Facebook.

Install on-site or rent a hosted solution.

Live action, captured by your readers!

Sent to your newspaper by mobile

Technology

The VG News Portal is based on standard technology with some major components:

Running on UNIX and Linux platforms, using Apache HTTPD web server v 1.3.x or higher, MySQL database v3.23 or higher, PHP scripting language v5x.

We recommend using your favourite flavour of Linux, Solaris or FreeBSD operating system.
